

SASFORREACH Consortium

SIEF Information Letter 3 Synthetic Amorphous Sodium Aluminium Silicate (NAS): LoA Agreement / -Cost

Dear SIEF members,

With this SIEF Information Letter the SASFORREACH Consortium (“**Consortium**”) would like to inform all SIEF members about the cost for the joint registration of

Synthetic Sodium Aluminium Silicate (NAS), EC # 215-684-8, CAS # 1344-00-9

The price for the letter of access (“**LoA**”) to the joint registration dossier for **Synthetic Sodium Aluminium Silicate (“NAS”)** depends on the tonnage band for which a registration is made and has been calculated on a preliminary basis as follows:

1000+	45,286.08 €
100-1000	45,286.08 €
10-100	31,699.66 €
1-10	22,900.91 €

Please bear in mind that every study/action which is listed in the cost calculation document was necessary for the successful registration of

Sodium Aluminium Silicate (NAS), EC # 215-684-8, CAS # 1344-00-9,

thus the price of the letter of access is not negotiable. Likewise, the LoA agreement defining the terms and conditions under which a letter of access will be issued is a standard document.

As the Consortium expects less than 2 potential registrants to join the joint submission for

Sodium Aluminium Silicate (NAS), EC # 215-684-8, CAS # 1344-00-9

in the highest tonnage band, no rebate in case of additional buyers is planned.

The Consortium will ensure full compliance with applicable REACH and other EU legislation.

After receipt of payment for the LoA, the lead registrant will provide purchasers of a LoA with a complete registration package, including a Letter of Access to the technical part of the dossier (parts 4 – 13), and the Chemical Safety Report.

For **NAS** the guidance on safe use (chapter 11) is submitted jointly on behalf of all consortia members. Therefore all further co-registrants may refer to this document.

The Consortium published some info and a short guidance for the registration of **NAS** on the homepage of the Consortium [<http://www.reach-sas.org/>].

Please also note that the costs for the LoA could only be calculated on a preliminary basis at this time, thus a final calculation may lead to additional charges or reimbursements. A final calculation will be prepared after the expiry of the last REACH registration deadline in 2018 and all purchasers of a LoA will be billed for outstanding costs, if any.

With kind regards

SASFORREACH Consortium representing Sodium Aluminium Silicate (NAS)
